2016-2017

## **Mission Statement**

Dedicated to fostering a passion in science and technology within our community, the Monta Vista Robotics Team inspires students and develops interpersonal skills through team-based engineering challenges.

## Team members are expected to:

- Respect all peers and mentors, and their ideas
- Embody the values of Gracious Professionalism at team meetings, community events, and FIRST events/competitions
- Embrace and act upon the values of MVRT and FIRST
- Abide by all school rules while on campus and at events

I have read the above terms and understand and agree to the contract.

- Act in a manner that is both safe and professional at all times, at all team meetings and outside events.

Members are expected to abide by all of the guidelines and expectations outlined above, in addition to those established in the future by team leadership. As per our ASB school constitution, the advisors, with the support of the administration, have the right to remove a student from the Robotics Team if the terms of this contract are not met. Removal could also result if a team member breaks school or district behavior agreements as outlined in the student handbook.

By accepting this agreement, I also understand that I may not join – to any capacity – any other team participating in the FIRST Robotics Competition. Violation of this agreement will result in removal from MVRT.
